

ISBN: 978-9948-15-747-2

An introductory guide to the birds of Qatar. Some 500 photographs are included to help identify 215 species of birds covering all the common, and many not so common, birds found in Qatar. Species have been grouped together by habitat to make identification easier. ISBN 978-9948-15-747-2.

Each page contains at least one photograph of the species being identified, together with a map of Qatar showing the distribution of the bird and a bar graph at the bottom showing the months which the birds can be found in the country.

The book also tells the reader where some of the better bird watching locations in Qatar are. It also contains the important "Bird watching code of conduct" which should be adhered to by all bird watchers irrespective of the country they are in.
